

DORADLA AMRUTHA PREETHI

amruthapreethi96@gmail.com | +91 99669 14934 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Third-year B.Tech student in Artificial Intelligence and Machine Learning, with hands-on experience building ML-based applications and Power BI analytics solutions. Completed two internships spanning AI/ML fundamentals and data analytics, backed by a strong foundation in Python, data science workflows, and full-stack web development. Focused on applying these skills to deliver measurable impact in a professional engineering environment.

EDUCATION

B.Tech, AI & ML — RMD Engineering College, Kavaraipettai	2024 – 2028 CGPA: 8.29
Class 12th — Sri Chaitanya Junior College	2023 – 2024 89.3%
Class X — Edify School, Tirupati	2021 – 2022 83.65%

INTERNSHIPS

AI/ML Intern — IICLUB June 2025

- Applied Python and core AI/ML fundamentals to build AI-generated cinematic videos and a Roboflow computer vision model.
- Built a Telegram bot and a website to integrate and deploy the trained models end-to-end.

Data Analyst Intern — Innovation Tech Tree June 2026

- Completed a structured Data Science track using Power BI, loading, cleaning, and transforming raw datasets with Power Query, and building custom DAX measures — including attrition rate, average tenure, and headcount summaries — for in-depth workforce analysis.
- Delivered a final capstone project: an interactive Power BI dashboard analyzing an employee dataset for a company, with visualizations covering department-wise headcount, attrition trends, and tenure distribution to support data-driven HR decisions.

PROJECTS

Smart Real Estate Recommendation System

Python, Machine Learning, JavaScript, HTML/CSS | [GitHub: Smart-Real-Estate](#)

- Built a machine learning-based web platform that recommends properties to users by analyzing location, budget, and preference data, and predicts property prices using a trained regression model.
- Implemented interactive maps and dynamic property filtering, improving search relevance and overall user experience on the platform.

Heart Disease Prediction using Quantum-Classical ML

Python, Flask, Qiskit, scikit-learn | [GitHub: Project Heart using Quantum](#)

- Built a Flask web application that predicts heart disease risk from clinical data (age, blood pressure, cholesterol, etc.) using a Random Forest model trained on the UCI heart disease dataset.
- Added a classical-vs-quantum comparison feature that trains a Logistic Regression model alongside a single-qubit quantum circuit simulated with Qiskit Aer, benchmarking the accuracy and prediction time of each.

MindEase — Mental Health Support Application

Python, NLP, HTML | [GitHub: Project MindEase](#)

- Built an application to support the mental health and emotional well-being of teenagers and adults using Python and NLP techniques.
- Generated personalized assessment results and healthcare tips based on user responses, enabling early self-awareness of mental health status.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional
- Oracle Cloud Infrastructure 2025 Certified APEX Cloud Developer

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, SQL

Web Development: HTML, CSS, JavaScript, React.js, Node.js

Data Analytics & BI: Power BI, DAX, Power Query

Machine Learning & AI: Machine Learning, NLP

Tools & Concepts: Git, VS Code, OOP, REST APIs
